

# Lothar-Collatz-Seminar

Wed, 26. April · 4:15 pm · Geom 241

**Dr. Roland Welter** (Uni Hamburg)

**Some remarks on heat transport in turbulent convection and  
a summary of Tucker's result on the Lorenz attractor**

## **Abstract:**

In this talk I'll give some remarks about modeling heat transport for climate models and also summarize Warwick Tucker's computer assisted proof that the Lorenz attractor is in fact strange.
